WHAT OUR PATIENTS SAY ABOUT US

Solvera Health

The Best Patient Experience

MEDICARE CHANGES WHAT'S NEW IN 2023?

- > **COST OF LIVING ADJUSTMENT (COLA)** increase for Social Security benefit checks is projected to be bigger compared to previous years due to inflation, while the Medicare Part B premium will decrease to \$164.90 for 2023 meaning more money in Seniors' pockets.
- > **THE MEDICARE PART B DEDUCTIBLE** will likely stay the same (\$233), controlling that cost. Typically, the deductibles in Medicare go up each year.
- > **MEDICARE HAS IMPOSED A NEW REQUIREMENT** that all phone calls regarding Medicare Part D and Advantage plans must now be recorded and stored for 10 years. Phone calls and virtual visits, like on Zoom, must be recorded.
- > **THE INFLATION REDUCTION ACT** introduced two major changes to Medicare:
 - 1. INSULIN SAVINGS PROGRAM** — all insurance companies offering Medicare Part D plans must cap the monthly copay for insulin at \$35 — no deductible, no gap. This includes Medicare Advantage plans.
 - 2. 100% COVERAGE OF THE SHINGLES VACCINE (SHINGRIX)** with no copay for this 2-dose vaccine.
